

# PROJECT 2025

EXPOSED

## How Project 2025 will harm the environment:

The extreme Republican plan would mean dirtier air and water in communities across America, and more extreme weather because the climate crisis will go unchecked.

- Rips the rug out from under domestic manufacturers and clean energy developers responsible for thousands of jobs by repealing all of the tax credits included in the Inflation Reduction Act. (p. 696)
- Guts financial support for rural Americans and low- and moderate-income families by repealing the energy efficiency support provided in the Bipartisan Infrastructure Law and the Inflation Reduction Act. (p. 365)
- Rolls back EPA protections for clean air that save lives. (p. 424)
- Undermines historic drinking water protections that protect Americans from cancer-causing chemicals like PFAS. (p. 431)
- Reopens protected lands for fossil fuel and mineral extraction. (p. 523)
- Expands fossil fuel leasing onshore and offshore, while rolling back Biden-Harris protections, and lowering rates for private oil & gas companies. (pp. 522-3)
- Bulldozes bedrock protections of American lands and wildlife by demolishing NEPA and the Endangered Species Act. (p. 533)
- Steals \$32 billion in savings from everyday Americans by letting automakers build less efficient cars, increasing costs for Americans at the pump and sending more exhaust into our air. (p. 628)
- Cuts support for public transit. (p. 635)
